

YANG Kong-Meng

Web Developer

Computer Science Master's Degree

Web developer with a Master's degree in Computer Science (MIAGE), specialized in JavaScript (React, Node.js) and Angular. Experience developing business applications in a professional environment (SNCF, CARSAT), from design to deployment.

Based in France (CET) — available for remote work.

EXPERIENCE

Web Application Developer — CARSAT (French regional social security & pension fund)

Apprenticeship — Sep 2024 — Aug 2025

Power Platform

Power Automate

Sharepoint

- Designed and developed a part-time work request application (Power Apps + Power Automate + SharePoint List), replacing a manual email-based process with a fully digitized workflow
- Implemented a 3-level approval workflow (Manager → Department Head → HR) via Power Automate, with automated email notifications and real-time request tracking
- Automated HR document generation (hours summary, validation forms), eliminating manual data entry for HR teams
- Designed and managed the associated SharePoint List database (requests, statuses, approval history)
- Worked remotely 3 days/week**, using secure two-factor authentication (mobile token) for VPN/workstation access — demonstrated autonomy and reliability in a hybrid work environment

Application Developer — SNCF (French national railway company)

Apprenticeship — Nov 2022 — Aug 2023

Power Apps

Power Automate

Dataverse

- Designed and developed the "SAV Responsible Portal" (Power Apps + Power Automate + Dataverse), a centralized dashboard enabling maintenance managers to track defects on train units and their operational impact, by region and unit type
- Modeled a multi-step workflow (request creation → contradictory review → intervention planning → completion) with visual status tracking at each stage
- Built a color-coded deadline alert system differentiating minor (3 business days) and major (5 business days) interventions for immediate priority identification
- Architected and deployed a Dataverse database with custom user permissions by maintenance center/region and sensitive data security

PERSONAL PROJECT

AI-Powered Portfolio — allmighty-dev.fr 2026

Angular 21

Spring boot 4

- Designed and developed a full-stack AI-powered portfolio, bilingual French/English — Angular 21 frontend and Spring Boot 4 backend, continuously deployed on Vercel and Railway
- Integrated the Claude API (Haiku) to power a dynamic conversational assistant answering recruiters' questions about my profile, driven by a system prompt generated from JSON data files
- Set up a complete CI/CD pipeline with GitHub Actions: automated tests on every push, deployment blocked until tests pass (Vercel Deploy Hooks, native Railway integration), multi-stage Docker containerization of all services
- Resolved real-world technical challenges (Angular change detection, multi-origin CORS configuration, secure secrets management, internationalized routing)

AI Image Analysis — allmighty-dev.fr 2026

React

Node.js

Claude API

- Developed a web application for AI-powered image analysis to identify damaged objects in a photo and estimate their loss and replacement cost
- Deliberately different stack from the rest of the portfolio to broaden my skill set: React frontend, Node.js/Express backend, file upload handling with Multer
- Integrated Claude's (Anthropic) vision API for image analysis, rendering results as interactive clickable bounding boxes overlaid on the photo, handling overlapping regions
- Deployed independently (Vercel + Railway), linked to the main portfolio via URL rewriting, with its own testing and continuous deployment pipeline

TECHNICAL SKILLS

Web development

Frontend

HTML5 · CSS3 · JS · React · Angular

Backend

Node.js · PHP · Java · Spring Boot

API

REST, architecture client/serveur

Databases

MySQL · MongoDB
PostgreSQL · Oracle SQL

Tools

Git · Docker
VS Code · IntelliJ

Practices

Agile/Scrum
Unit & Integration Testing
CI/CD

ACADEMIC PROJECTS

OnlyCraft (5-person team)

Full-stack web platform (React, Java), REST API, MySQL/MongoDB, microservices architecture, Docker

Pandemic (3-person team)

Collaborative web app (Angular, Spring Boot), REST API, MongoDB, client/server architecture

Portfolio : allmighty-dev.fr

EDUCATION

- Master's Degree, Computer Science (MIAGE)

Université Orléans UFR Sciences & Techniques
2022 - 2025

- Bachelor's Degree, Computer Science (MIAGE)

Université Orléans UFR Sciences & Techniques
2021 - 2022

- Associate Degree, Software Engineering (BTS SIO)

Lycée Benjamin Franklin
2019 - 2021

Soft skills

- Problem-solving
- Fast learner
- Code quality & attention to detail
- Technical communication
- Autonomy

Langues

- English: Professional working proficiency (reading/writing documentation, simple spoken conversation)
- French: Native
